

FOR IMMEDIATE RELEASE

LEGAL SEA FOODS ADVANCES FOOD QUALITY & SAFETY WITH STETON

If it isn't fresh, it isn't Legal!™

ST. GEORGE, Utah, July, 2006— Steton is pleased to announce the addition of Legal Sea Foods to its growing list of prominent foodservice clients. Legal Sea Foods is known for offering premium seafood with uncompromised quality at each of their 30 locations. With a premium brand such as Legal Sea Foods, protecting their reputation is paramount.

“Steton helps us protect our reputation and our brand,” states Stephen Martinello, Director of Quality for Legal Sea Foods. *“We are able to quickly identify trends and communicate much more effectively than ever before.”*

Martinello has demanding responsibilities since Legal Sea Foods processes their own seafood as well as prepares and serves the seafood through their upscale casual-dining restaurants and a growing mail order business. Operating every day to maintain the high standards their customers have come to expect, Legal Sea Foods' quality control (QC) team also doubles as in-house health inspectors. *“Ensuring that not one step is overlooked related to the public's health and safety is at the forefront of our team's objectives,”* states Martinello.

The ability to react to information gathered from Legal Sea Foods' QC inspections is faster than ever before. *“Our formal reports previously took up to 20-25 days to complete after an inspection. Now, reports are automatically completed immediately after the inspections. We can analyze our findings with real-time information and much more readily identify trends.”*

“Our QC team is also much better informed,” Martinello continues. “In our case, we have enabled everyone in our QC team with access to view each others inspections online using Steton. This makes our inspectors much more aware of issues, no matter how minor they are, and enables our team to better able collaborate on best practices or corrective actions that need to be put in place.”

About Legal Sea Foods

Since 1950, when George Berkowitz opened a fish market in Inman Square in Cambridge, MA, the Legal name has been synonymous with quality and freshness. Then, these Boston roots sprouted an East Coast legend when George and his wife, Harriet, opened their first seafood restaurant next to the family fish market in 1968. The fish was prepared simply in a no frills environment, but the food was sublime and word spread quickly about the surprising little fish place. Now, under the leadership of Roger Berkowitz, George’s son, Legal operates over 30 family-owned restaurants from Boston, MA to Florida and a mail order business. From simplicity to sophistication, for three generations, the Berkowitz family has continued this tradition of serving the highest quality, freshest fish for a great value!

About Steton

Established in 1996, Steton is the leading provider of mobile data collection and reporting software for professionals responsible for public health, safety, quality assurance, and social responsibility. Steton empowers organizations to avoid loss and increase compliance through improved data accuracy, corrective action management, and real-time reporting.

A snapshot of Steton’s clients include the top quick-service and casual dining restaurants in the world, the world’s number one retailer, leading food processors, the global leader in contract food service, the world’s largest and most respected hotel chains, leading third-party auditors and laboratories, government agencies, airlines, correctional facilities, and the list goes on. These prominent organizations have turned to Steton to help protect their most valuable assets—people, products, and brands. Steton’s rapidly expanding list of clients across multiple industries has made Steton’s software the technology standard for professionals managing risk and regulatory compliance.
